

Sovereign, immutable backup for Australian business.

Backup Experts protects servers, virtual machines, desktops and cloud accounts. Every backup is stored in Australian datacentres and automatically copied to separate immutable storage arrays, so data cannot be encrypted, altered or deleted by ransomware or administrators.

WHAT WE PROTECT

- Windows Servers
- Linux Servers
- Windows Virtual Machines
- Windows Desktops & Laptops
- Microsoft 365 Accounts
- Google Workspace Accounts

PRICING

WORKLOAD	FROM	INCLUDES
Servers	\$95 per server / month	Windows & Linux, bare-metal recovery
Virtual Machines	\$50 per VM / month	Includes 2 TB storage pooled per account
Endpoints	\$12 per endpoint / month	Desktops & laptops, continuous protection
Microsoft 365 / Google Workspace	\$5 per account / month	Unlimited data per account

WHY BACKUP EXPERTS

Immutable by default

Object-lock copies cannot be encrypted, modified or deleted.

No egress fees

Restores and recoveries are included in the per-workload price.

INFRASTRUCTURE

Australian data is stored in Equinix SY5, Sydney. Backups are automatically copied to a separate immutable storage array with object-lock policies. Default retention is 90 days, extendable to 12 months.

Australian data residency

Primary and replica copies stay onshore in Equinix SY5, Sydney.

Tested restores

We validate a test restore with your team, not just a green tick.

ONBOARDING

Getting protected is simple: install the agent on each machine, or connect Microsoft 365 / Google Workspace. Most organisations are protected within one business day, finishing with a validated test restore.

PROVEN AT SCALE

One customer migrated 96 servers from on-premises Veeam to Backup Experts, saving \$75,000 per year on licensing.
